INDICATORS ALARM UNITS TIMERS AND COUNTERS

GEFRAN

THE ACKNOWLEDGED INTERNATIONAL LEADER

Thanks to forty years of experience, Gefran is the world leader in the design and production of solutions for **measuring, controlling, and driving industrial production processes.**

We have 14 branches in 12 countries and a network of over 80 worldwide distributors.

QUALITY AND TECHNOLOGY

Gefran indicators are designed to directly **acquire multiple physical variables** such as temperature, pressure, displacement, force/weight, humidity, and many others via normalised signals.

SOFTWARE

GF_eXpress

Configuration kit for Gefran instruments by means of PC (Windows environment). Lets you read or write all of the parameters of a single instrument via serial connection.

- > A single software for all models
- > Easy configuration
- > Copy/paste, save recipe, trend functions
- > Rapid configuration of instruments
- > Saving and management of parameter recipes
- > On-line trend and saving of historical data
- > Recovery of factory settings
- > Custom linearization
- > On-line user manual

PLASTICS

MATERIAL TESTS

ONE STOP SHOP

Gefran offers complete display solutions for industry, providing its own sensors and ensuring maximum component compatibility and integration.

The numerous models in the catalogue offer different acquisition speeds, read resolutions, and specific functions assignable to auxiliary inputs and to alarm outputs.

SERVICES

PRE AND POST SALES

A team of Gefran experts works with the customer to select the ideal product for its application and to help install and configure devices (customercare@gefran.com).

TRAINING

Gefran offers a wide range of courses at different levels for the technical-commercial study of the Gefran product range as well as specific courses on demand.

MARKETS

WEIGHING SYSTEMS

TEST BENCHES

MACHINES FOR WOOD AND MARBLE

ROLLING LINES

ALL GEFRAN INDICATORS FEATURE

INPUTS

Configurable universal analogue inputs for main variables and auxiliary analogue/digital inputs for additional functions.

KEYBOARD

Keyboard for rapid setting and diagnostics.

LEDS

LEDs for constant display of main instrument states.

DISPLAY

Clear and immediate display of main variables.

IP65

Elevated front panel protection without accessories.

OUTPUTS

Various types of outputs for alarm management, input retransmission.

FLEXIBILITY

Connection to process via various types of sensors.

SHARED SOFTWARE

All models use the same software.

READY TO USE

Pre-installed software for zero start-up time.

EASY TO USE

Immediate and intuitive parameter settings.

UNIVERSAL MODELS

Gefran indicators and alarm units feature flexibility, simplicity, and compactness.

Available in versions measuring 72x36...48x48 and 48x96, they indicate variables such as temperature, displacement, and force.

HIGH PERFORMANCE MODELS

Gefran's 2400 series of indicators provide speed and precision, ensuring the measurement and setpoints of pressures (direct and differential), displacements, forces, temperatures, and process variables read by amplified sensors.

Calculation capacity

- Ability to compare input variables, engineer measurements, derive flow values.
- Use of results of math functions such as value of process/ alarm limit/retransmission output.

Double channel

- Two main universal analogue inputs for two simultaneous acquisitions with a single instrument.
- Direct feeding of up to 6 load cells.

Easy calibration

- Calibration of input by copying sensor plate data.
- Standard calibration with specific menu
